

# Core Insurance

Configuration is your decision

## InSoft Core Insurance

InSoft Core Insurance is a complete insurance backoffice solution designed specifically for insurance underwriters and underwriting agents.

InSoft Core Insurance is a feature rich and highly flexible application with robust processes to manage policies throughout their lifecycle. Insoft Core Insurance has an advanced graphical user interface (GUI) which enables you to configure new insurance products without the need for technical developers.

From the initial enquiry to full client, policy, claims and accounts management, InSoft Core Insurance is a smart, simple, and cost effective solution that will meet your back office processing and reporting requirements.

With InSoft Core Insurance you can:

- Configure any term based insurance product
- Generate business reports quickly, easily and in real time
- Configure taxes, reinsurance, commission and premium calculations for each standard policy.
- Manage sales, claims, reinsurance, agents, tax, levies, and accounting functions
- Capture any type of underwriting or risk information
- Group policies into product categories or by class of business
- Remove processing bottlenecks and reduce costs by simplifying your processing requirements
- Integrate with additional InSoft systems to create a powerful online presence offering insurance services direct to your clients and brokers
- Advanced template engine allows you to create, edit and maintain standard documents and unlimited number of custom templates
- Store documents, images or any other file through the integrated document management system
- Plus much much more...

InSoft Core Insurance includes the policy and account management tools, as well as the business intelligence, reporting, and processes required to enable your organisation to thrive.

InSoft Core Insurance - *Configuration is your decision*
