

# Core Reports

Your business intelligence when you need it

## InSoft Core Reports

InSoft Core Reports is available as part of InSoft Core Insurance and allows you to generate crucial business reports and analyze your business data in real time.

Standard Reports are included within InSoft Core Insurance and Adhoc Reporting can be included as an optional add-on.

InSoft Adhoc Reporting uses Oracle Discoverer® from the Oracle Business Intelligence® suite. Via an end user layer, you can easily create valuable business reports through the report generation wizard.

## Standard Reporting

Standard Reporting is included with InSoft Core Insurance. With over 80 Standard Reports, it gives you an extensive array of business analysis options that can be generated, saved, and distributed quickly and easily by non-technical staff. All reports are generated in PDF format and some reports can be exported to spreadsheet for further analysis.

Our consulting services can modify any existing reports and create new reports based on your specifications.

## AdHoc Reporting

Adhoc Reporting is an optional inclusion that enables your organisation to gain even greater leverage from your business data. With Adhoc Reporting, you can create your own reports, selecting only the data you require or you can customise existing standard reports to gather the business intelligence you need.

Adhoc Reporting enables non-technical staff customise and generate reports in minutes.

## Benefits for your business

- **Create**, save and distribute reports in minutes
- **Generate** reports without the need for specialised IT staff
- **Customise** reports to suit your specific business needs
- **Reduce** the time and costs associated to the generation of reports
- **Improve** decision making ability through access to real time business information

Insoft Core Reports – **your** business intelligence when **you** need it
